

MODEL MT-225 COMBO 7/16" SOCKET

The anodized aluminum Model MT-225 incorporates our multi-use philosophy. The tapered head, 7/16" hex socket easily slips between clamp band and nut on most 'pop-up' floor cleaning valve control pods. Using a screwdriver in the center hole or battery operated drill and a 3/8" drive bit in the opposite end quickly removes the clamp.

The opposite end is a four-prong head which mates with the face of CMP's 'Josam' wall fitting. A screwdriver through the center hole as a handle loosens the plug.

ONE YEAR WARRANTY

To submit a warranty claim, send a smartphone image of the socket showing the damage or failure and a screen shot of the sales receipt to: 813.833.3739 or email: pwlshr757@msn.com

Claims may be submitted through your distributor or retailer, but may take longer. As poolers, we understand the frustration when tools break and we strive to make the most durable of tools. Your feedback-both positive and negative-is greatly appreciated.

Multi-Tork Pool Tools is not responsible for damage or injury resulting from the use of this tool.

MADE IN THE U.S.A.
