

MT-250

3/8"-Drive Stainless Steel Universal 7/8" Socket

While the Model 250 socket was designed for certain swimming pool equipment using a 3/8" drive socket wrench, it can be used as any other standard metal 7/8" hex socket with a drill or portable driver.

This socket like all Multi-Tork sockets, is proudly made in the U.S.A. and it carries a lifetime warranty.

Should the socket fail, send an image via smartphone to: 813.833.3739 or email * along with a screenshot of the sales receipt.
