

## OUR MISSION:

**To make every new generation of sockets stronger, more reliable, more durable and more versatile while keeping them affordable.**

## **PLEASE READ BEFORE USE:**

**OVER-TORQUING ANY CLAMP SYSTEM MAY CAUSE PERMANENT DAMAGE TO BOTH THE EQUIPMENT AND THESE SOCKETS. USE SHORT BURSTS ON INITIAL USE UNTIL FAMILIAR WITH THE TORQUE CAPACITY OF YOUR DRILL. MULTI-TORK® CLAMP SOCKETS ARE NOT DESIGNED TO OVER-TIGHTEN CLAMPS TO STOP LEAKS. O-RINGS SHOULD BE CLEANED AND LUBRICATED DURING SERVICE OR REPLACED AS NECESSARY.**

**Our flagship socket MT-50 "Quad Cavity" continues its reputation for versatility and now offers even easier access to hard-to-reach knobs and plugs. Fits virtually all 3 and 4-lobe industry clamp knobs.**

**The 'Dual Geometry' makes it possible to service both the older 2-1/4" knob and the newer 3" knob of the Sta-Rite® Modular and DE filter systems. User Advisory: When using impact drills, set a low clutch first. When the knob breaks loose, reset a higher torque on your drill. For extremely tight knobs: first, loosen the knobs with a wrench.**

**Pool Techs appreciate not only the value, but the versatility and reliability of the MT-100. The high-grade aluminum construction means years of trusted performance. The 9/16" and 7/8" double-hex socket and deep well eliminate carrying extra hardware.**

**All three sockets are warrantied for one full year from the date of purchase. In the event of failure, call toll-free\* for replacement instructions. Multi-Tork Pool Tools shall not be liable for any loss or damage arising from the use of these sockets whether direct, indirect, or consequential.**
